18. Signature of Case Manager: _____ **Date** ***(mm/dd/yyyy)*****:** _____

Instructions

a. Enter the patient's name.

b. Enter the specific dates *(month and day)* for the thirty (30) day time period this report covers.

c. Enter the month, day, and year of birth.

d. Enter the county the patient resides in.

e. Enter the date therapy initially began. If the regimen has to be restarted because of treatment lapses, explain in question #17.

f. Enter the date that you last visited the patient.

g. Enter the month of therapy, e.g. 1, 5, 6, etc. and length of expected treatment duration.

h. For completion of treatment, enter the date that the last dose of medication was ingested.

i. Check all symptoms that the patient had during the most recent visit. Site-specific extra-pulmonary symptoms can be explained in the "other symptoms" comment box. Select one category that generally describes the patient's overall condition.

j. Enter the drugs and the dosage that make up the patient's prior thirty (30) day treatment regimen. Check the appropriate box for directly-observed therapy and frequency of administration. If the patient is not on DOT, please explain why not. Therapy administered by a friend or family member is not DOT. *Please attach a copy of the DOT log for the reporting period.*

k. For the next thirty (30) day treatment, indicate if you are expecting any changes in medication, dosage, frequency and DOT. Please explain any anticipated changes.

l. Enter the patient's current weight.

m. For pulmonary TB patients, enter the applicable sputum collection information. For patients who are still AFB smear-positive and have not had sputum collected recently, or who do not yet have documentation of negative sputum cultures, please explain why sputum is not being collected.

n. Enter the date of the last conversation you had with the patient's physician. Attach notes from patient visit, if applicable

o. For patients with pulmonary or other intrathoracic disease, enter whether or not a chest radiograph has been performed since the initial one. If so, attach the dictated report.

p. Enter if any other diagnostic tests have been performed.

q. If needed, enter any comments, e.g., changes in the treatment plan, non-adherence issues, medication side effects, etc.

r. Sign and date the form. **Upload and attach form to patient's TB Investigation in NBS.**
